

Kate Bradshaw David

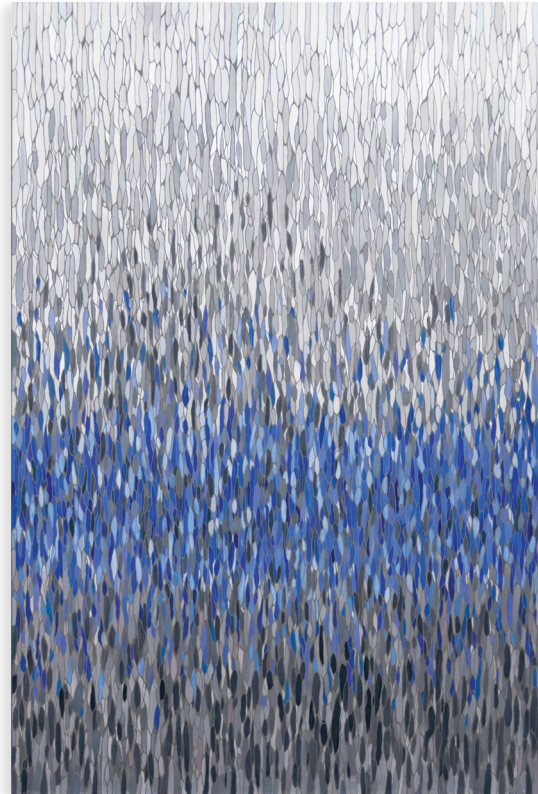

Artist Statement

I am fascinated by the tessellations that occur in nature: the visual likeness between a speck of dust and a boulder, the same fluid dynamics between rushing water and once-molten lava cooled a millennia ago. I reduce these disparate elements to their bare outlines and then transform them using vibrant color and intentional line distortions to create a new, fantastical landscape. These abstracted, non-representational forms create personal meaning for the viewer through my use of contrasting and/or complementary colors and either organic or linear shapes. I want to evoke an emotional and tactile response for the viewer, one that transports them to a momentary meditative visual sanctuary.
